

CPD Questions - Dr Niki Osborne

1. If you saw the gorilla but did not see the player who left or the background change colour, why is that? Why did Group A give a much higher price for the hotel room than Group B?
2. What is the problem if a senior forensic scientist (or indeed any second forensic scientist) merely records "seen and agreed" as a form of review of the work of a colleague?
3. What is the concern that can be raised if a forensic scientist is given extraneous information that is not relevant to the test being carried out?
