

Mahoney on Evidence Act and Analysis (2nd Edition)

Authors

Scott Optican and Elisabeth McDonald (General Editors)

Alexandra Allen-Franks, Andrea Ewing, Fionnghuala Cuncannon, Jack Oliver-Hood, Nick Whittington

Description

Since its initial publication in 2007, the *Evidence Act 2006: Act and Analysis* has stood as the leading and authoritative text on the Act in New Zealand. Extensively cited in judicial decisions and academic writings, its section-by-section commentary — enriched with extensive cross-referencing — offers a comprehensive description, analysis, and critique, providing a wide-ranging explanation of the Act, its underlying principles, and its individual provisions.

Now in the second edition under the title of *Mahoney on Evidence*, the book continues to build on its reputation as an indispensable resource for academics, practitioners, researchers, policymakers and law students alike. The text provides an updated examination of the Evidence Act 2006 and a thorough treatment of noteworthy court decisions (past and present) from the New Zealand Supreme Court, Court of Appeal and High Court. The new edition examines the amendments to the Act resulting from the Sexual Violence Legislation Act 2021 — which enacted a number of recommendations from the New Zealand Law Commission's 2019 second review of the Evidence Act. The book also highlights the Law Commission's 2024 report following its third (and final) statutorily-mandated review of the Act.

Mahoney on Evidence: Act and Analysis (2nd edition) is authored by some of New Zealand's leading evidence law academics and practitioners. They bring their unique perspectives to this latest volume, which offers an invaluable scholarly and practical treatment of the law of evidence in New Zealand today.
